

Chair language crib sheet

Module 2 handout. Pair with Lessons 3-4.

Open (permission first)

- ? "Would it be alright if I mention something I'm noticing on the scalp?"
- ? If no: respect, still adapt quietly for comfort

Describe (observation only)

- ? "I'm seeing some redness along the parting."
- ? "There's a bit more shed on the cape than last visit."
- ? "The parting looks a little wider than I remember."
- ? "I'm seeing stress along this hairline where the ponytail sits."

Ask (one or two questions)

- ? "How long have you been noticing that?"
- ? "Has anything changed recently with health, stress, colour, or styling?"

Match the picture

- ? Sensitive: "We'll keep today's service gentle and avoid anything that might sting."
- ? Flake / build-up: "We can look at a clearer cleanse and a lighter root routine."
- ? Shed: "Some increase can follow stress or illness a couple of months later. If it's heavy or patchy, I'd rather you had it checked properly."
- ? Breakage: "This looks more like snap through the lengths than loss from the root. We can ease chemistry and heat."
- ? Pattern: "We can style and colour in a way that is kinder to the scalp. Clearer answers need a clinician."
- ? Traction: "Looser tension and rotating styles would be kinder while we monitor this."

Recommend with limits

Use: "Based on what I'm seeing, I'd suggest... The reason is... What it won't do is..."

- ? Support comfort, manageability, appearance of density, less breakage
- ? Do not claim cure, guaranteed regrowth, or medical treatment

Avoid

- ? Miracle promises
- ? On-the-spot disease names as fact
- ? Dismissing real worry
- ? Loud floor announcements about someone's scalp

Close

"I'll look after what we can safely do here, and I'll help you find the right next step if this needs more than salon care."

Referral wording

"I'd like you to have this checked by a trichologist or your GP. I can keep salon care gentle in the meantime."

Pathway: trichologyacademy.co.uk (education) and Knutsford clinic via the Academy loop when client assessment is needed.
